

## Family eBook Series

*A series of eBooks that the family can use to enjoy together*

### Nursery Rhymes

This eBook was created with the youngest members of the family in mind. The idea was to bring the old traditional Nursery Rhymes back into this generation, remembered the way they were originally.

Taking the rhymes and images from [commons.wikimedia.org/wiki/Main\\_Page](http://commons.wikimedia.org/wiki/Main_Page), I cut and stuck, moved around and tried many different ways of presenting this eBook before using computer resources, like NeoOffice drawing or Photoshop.

It was designed so it can be in travel pocket size for children to read on the go. The final copy was made on 12<sup>th</sup> April 2010 and published on the Diffusion website on the 1<sup>st</sup> May 2010:  
<http://diffusion.org.uk/?p=1926>

The first cube I made and designed was a Christian Calendar and it was completed on the 10<sup>th</sup> March 2010.  
 The calendar cube was about making a Calendar 3D: the fact that the cube has 12 sides (6 spaces either side) fitted brilliantly with this idea because there's 12 months in a year. I searched for and downloaded the images from [www.google.co.uk](http://www.google.co.uk), which had its own christian verses and made the calendar a bit unique.  
 When I put the cube together you see the first 6 months, then you can undo and redo the other side for the next six months.

## Christian Calendar

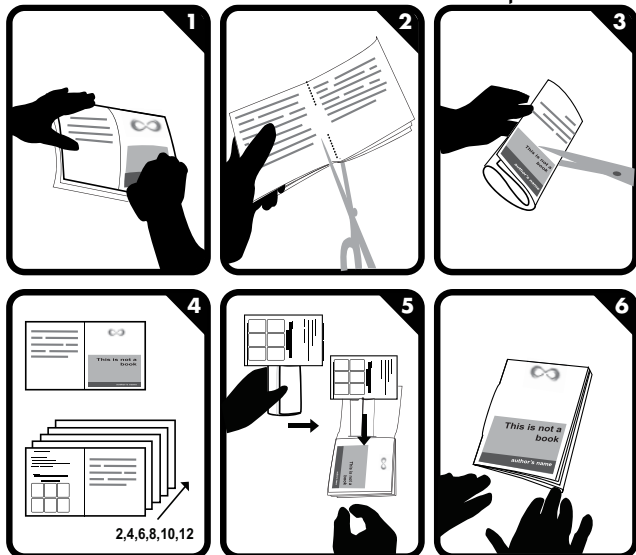

## *Designed cubes that tell different stories* My StoryCubes

From the 9<sup>th</sup> March 2010 to the 13<sup>th</sup> August I worked as a Communications Assistant in FJF(Future Jobs Fund) placement for a company called Proboscis, which is run by a man named Giles Lane and a woman named Alice Angus.

During this time I was involved in workshops and making many of my own created eBooks and StoryCubes.

This book is about those eBooks and StoryCubes developed throughout this job.

made with [www.bookleteer.com](http://www.bookleteer.com) from proboscis

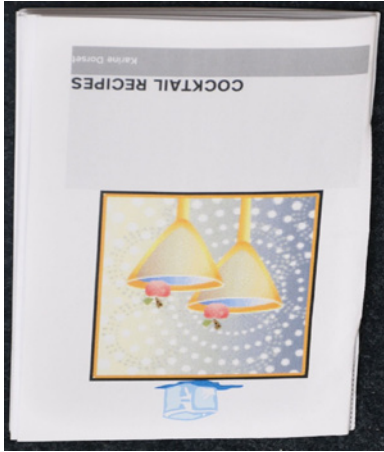

## The Alternative Whistle-stop West End Culture Quarter Tour

From 5<sup>th</sup> till the 9<sup>th</sup> of July my work colleague, my boss and I worked on a project about an alternative tour on west end culture called 'Seven Dials in Seven Days' and it was based in a shop on Earlham street, in the heart of Covent Garden. The Alternative Whistle-stop West End Culture Quarter Tour was an eBook I created based on this project.

It's about another way of seeing West End Culture in Covent Garden. The eBook is built up of photographs taken on the tour, information that was researched and addresses of the seven culture attractions in Covent Garden. It took a total of four days to research and put together, with help of a writing team of FJF(Future Job Funds) Placements. It was a bit of panic to finish but I'm happy with the end result.

The final copy was completed on 21<sup>st</sup> July 2010

The final version was completed on 17<sup>th</sup> May 2010 and was published to the Diffusion website on 26<sup>th</sup> May 2010: <http://diffusion.org.uk/?p=2016>

I got the recipes from my own knowledge and experience of cooking the dishes. downloaded then printed the images, traced them to my own design, scanned my traced drawings and then placed them into the template.

Cook 'N' Colour is an eBook designed to help create bonds between children and adults. This eBook was based on the thought of being able to let children cook easy to do recipes and get creative by colouring in the drawings of the finished dishes.

## Cocktail Recipes

Cocktail Recipes is an eBook designed for people aged 18 years and over. It's about making cocktails, which can be fun, and can also give you ideas for parties or a night in with your friends.

I started off by looking for very different types of cocktails, from each other, and even looked at some of their history. I then collected images that related to the cocktails to add that decorative effect. Using NeoOffice Drawing, I arranged the images and content I had, to present this as an eBook.

The final version was completed on 9<sup>th</sup> June 2010 and was published to the Diffusion website on July 15<sup>th</sup> 2010: <http://diffusion.org.uk/?p=2076>

It was completed on 24<sup>th</sup> June 2010

It has questions related to a MeBook Idea my boss had, they'll be used to stimulate your mind in the groups sessions that will take place in the workshop.

These StoryCubes were made to use in a workshop called 'Me workshop', that hasn't been put into action yet but will in the near future hopefully.

## MeSketch Cube

It was completed on the 19<sup>th</sup> May 2010.

This was a StoryCube to show how the new A3 design templates for the cubes can be used. It has photographs of all the books I had created, to put in the family eBook series.

## My eBooks

## Twitter Cube

This cube was also completed on the 10<sup>th</sup> March 2010 and was a tester to get used to the new software and cube design template's.

The twitter cube was based on the idea of giving visual 3D information on what twitter is actually about. Once again I searched for and downloaded the images from [www.google.co.uk](http://www.google.co.uk), arranged them with the text, and the story cube was made, quiet easy when you have an idea to run with.

A link to the website its published on: <http://diffusion.org.uk/?p=1851>

## Me cube

This was just another tester cube with pictures of me. Had a lot of fun making this one, and got a bit creative. It was created, also on the 10<sup>th</sup> March 2010.

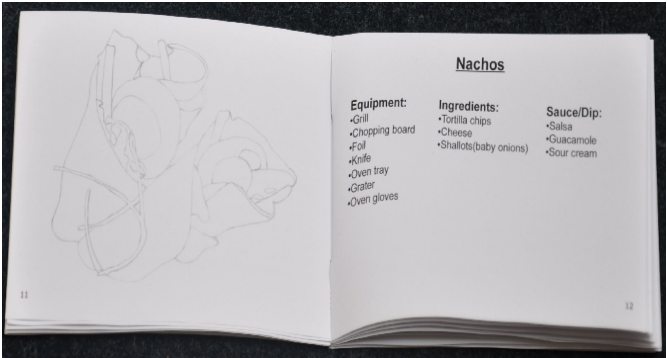

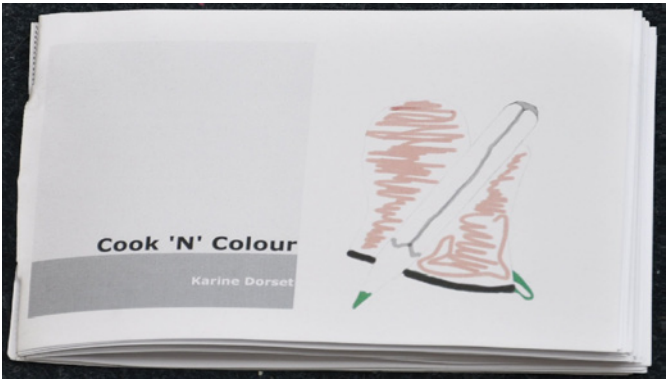

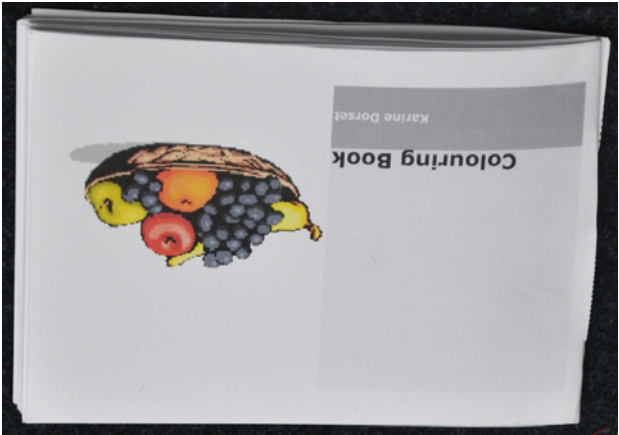

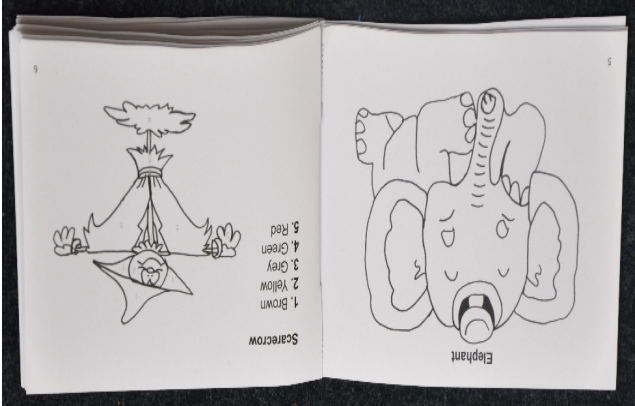

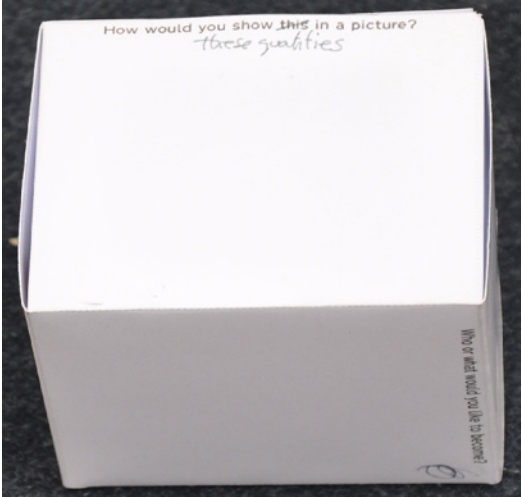

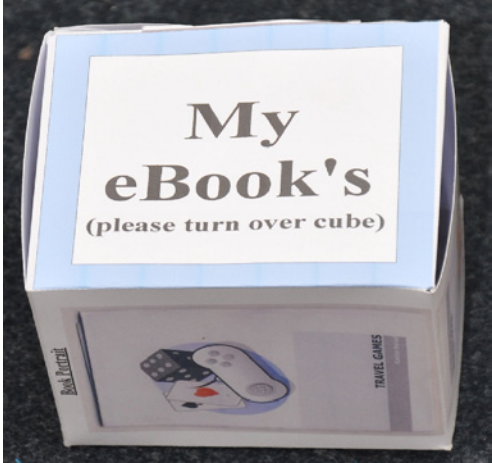

The Mothers Day eBook was created on 11<sup>th</sup> March 2010 and the Fathers Day eBook was created on 18<sup>th</sup> June 2010.

This eBook was based on the idea of transforming a Mothers or Fathers Day card into a personal designed Mothers or Fathers day eBook. The book design template was an A4 classic portrait.

I took pictures from home, wrote my own poems and searched for some quotes, prayers and versus that represented a Mother and Father.

### Mothers/Fathers Day

## My ebooks eBooks I have designed and created

Just like most of the population I like puzzles, numbers or word games like you see in the newspaper or the A4 puzzle books, so my idea was to make a personal eBook version, one which you could do travelling anywhere.

I made the Word-searches, Cross words and Cryptogram puzzles myself through a puzzle maker on the internet. I used Sudoku and Criss Cross puzzles from copyright free websites.

The name 'Travel Games' came from brainstorming ideas, then uploaded through Bookleteer and made into this eBook.

The Final copy was made on 14<sup>th</sup> April 2010 and was published on the Diffusion website on 1<sup>st</sup> May 2010:  
<http://diffusion.org.uk/?p=1926>

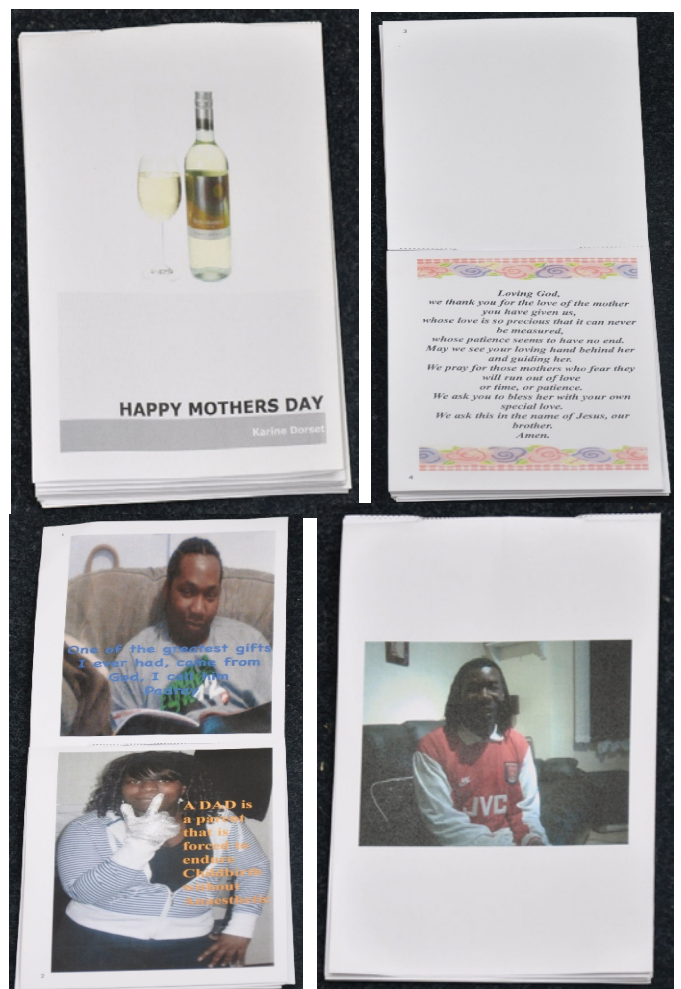

## Travel Games

## Colouring Book

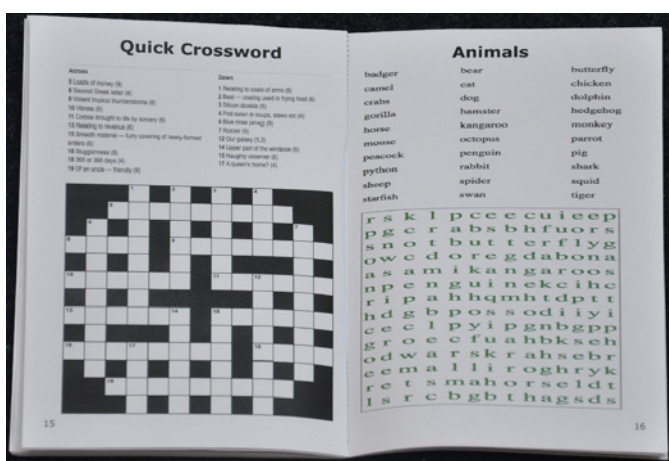

The Colouring book was an eBook designed and created using NeoOffice, OpenOffice and Firefox. The idea was to get all types of images from animals, to places, from food to people etc, for children to get creative and colour. It was also designed for travel fun but can be used where ever, whenever. But it's not just a colouring book, it has a bit more activities. You can fill in the images by numbers allocated to the right colour, or just write about the image that you did colour.

I printed the images from the internet, traced them, scanned them and add numbers, lines or quotes were it was needed.

The Final copy was finished on 28<sup>th</sup> April 2010 and also published to the Diffusion website on 1<sup>st</sup> May 2010:  
<http://diffusion.org.uk/?p=1926>

**Recipes**

This book was a tester. It was an idea that came about in a brainstorming session to see what new usage I could make out of the eBooks.

All the content was downloaded from the internet, arranged using NeoOffice and then placed in to the classic landscape template on Bookleteer website.

It was completed on 23<sup>rd</sup> March 2010

**Prayer Book**

The Prayer book was also a tester. It was aimed at getting different types of groups interested in bookleteer and maybe even proboscis.

I used prayers that a lot of people will be familiar with and and downloaded some great photos from the internet.

This eBook was completed on 24<sup>th</sup> March 2010.

## Diffusion book/classic portrait

Diffusion book portrait and classic portrait was an eBook created to show potential users of Proboscis' Bookleteer website what it's all about.

This eBook tells you about eBooks and StoryCubes, what you can do with them and how to make them. The name book portrait or classic portrait is the template layout.

I put together the text for my knowledge and understanding of bookleteer, eBooks and StoryCubes. Gathering picture and content consisted of logos from Proboscis, diagrams from the Bookleteer and Proboscis website. Scans from my own eBooks, and sticker templates were also used.

It was completed 18<sup>th</sup> March 2010.
