

Risks - Social Control

Will monitoring technologies lead to ever greater surveillance, restrictions on mobility and other forms of social control?

I don't mind being listed somewhere, but only for security reasons.

I don't want it being used for commercial purposes, personalizing services etc.

How can we power life on earth?

Interventions - Energy

geekyoto 2008

geekyoto eBook: your ideas on interventi

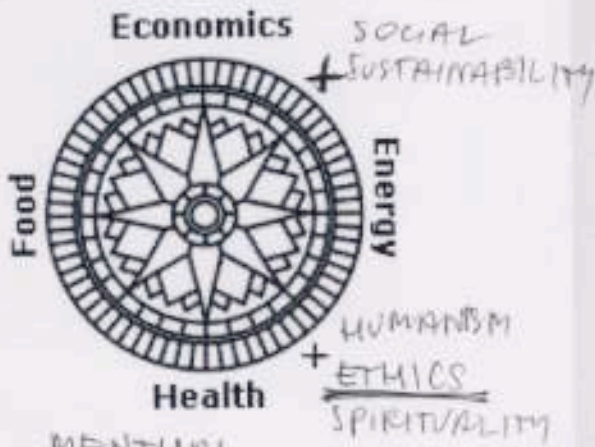

Are we facing new conflicts not only over resources (water, oil, raw materials etc) but also over the right to benefit from development?

Risks - Conflict

Your Name AGNIESZKA GRYGLEWICZ

Here are the key themes as we see them now, sometimes they are in opposition, other times not. What's missing from this matrix? Does each area deserve the same degree of attention and effort? Mark off how much you think each area should receive.

ECONOMICAL SUSTAINABILITY

MENTAL WELLBEING!!!
 AND HEALTH!!!

- sufficient amount of healthy food and fish etc
- keep able to have healthy note matter
- feeling of security
- not being afraid about the future
- freedom of expressing oneself
- and possibility of developing oneself

What is the bottom line for life on earth?

Interventions - Economics

Risks - Pyrrhic Victories

Are we just inventing more polluting technologies to save us from the effects of industrialisation and the consumer society?

10 6

Local markets should be developed.
Unfortunately, it is normal for people to get overwhelmed by consumption once they have means, products, money.
Firmness that it's bad comes later.
One can't refuse somebody life on "decent" level.
The most important is to find balance.

Risks - Displaced Consumption
Are we just shifting the sites of production and consumption to somewhere else?

Interventions - Health

How can we improve the health of life on earth?

- campaign promoting organ donation

+

databases → fast information flow

for developing countries especially

5 9

- western markets are flooded with products.
- disparities consumption especially ^{education} 'NOT PRODE' food to poorer countries.
- HELP to produce

How can we nourish life on earth?

Interventions - Food
