

DIFFUSION

How to make a Diffusion eBook

1. First, fold each sheet in half along the vertical axis.
2. Using a craft knife or scalpel, cut a horizontal slot along the centre dotted line of the first sheet (the sheet with the cover). You can use scissors if you don't have a scalpel or craft knife. Gently pinch (but do not crease) the first sheet (with the cover page) vertically in the centre and cut along the dotted line to make a central slot. Flatten the sheet.
3. Then, cut along the dotted lines on all the other sheets. Make sure to cut to the very edges of the paper.
4. Stack the folded sheets in ascending order with the even numbers at the top (pages 2/4/6/8/10/12/14, depending on how many sheets of paper the eBook is printed on). Curl the bottom halves of the sheets, but DON'T fold them.
5. Thread the curled sheets through the central slot of the first sheet. The front cover and back cover should both be visible on the same side of the stack.
6. After the sheets have been threaded through, check the pagination. Then fold the booklet in half along the horizontal axis.
